

LAMBDA'S LIST OF RECOMMENDED

MOODLE MODULES

Lambda Solutions is a Full Service Moodle Partner dedicated to providing a wide range of Moodle Services at an affordable price, including Moodle Provisioning. The Moodle Modules listed below are hand-picked and recommended by Lambda Solutions out of hundreds of custom modules. For a full list of Moodle modules, visit: <http://moodle.org/mod/data/view.php?id=6009>.

INCLUDED MODULES

We include the following modules in all of our Moodle installations and configurations, on top of the Standard Moodle Package.

Activity Locking

Sets up conditions that a student must reach before being able to start or unlock a Moodle activity. These criterion generally include time spent, score achieved or activity completed. The conditions can be applied to more than one activity or resource for each lock.

Maximum Enrolment

Allows a course to have a limit on participants and have this limit displayed.

PayPal

A Module included in Moodle's core code which adds PayPal e-commerce functionality to your courses.

RECOMMENDED MODULES

We recommend the modules below to clients that require specific functionality in Moodle. They are available in our Level 2 and Level 3 Moodle Provisioning Plans.

Attendance

Adds attendance as an activity to each course you wish to keep attendance in.

Adobe Connect

Integrates Adobe Connect web conferencing / online meeting software with Moodle.

Certificate

The Certificate module creates PDF certificates/diplomas for students of the course and is completely customizable. You can add borders, watermarks, seals and even show grade information.

Dialogue

Allows students or teachers to start two-way dialogues with another person. Some users may find this a useful alternative to Moodle's messaging system, as it is an actual activity in the course.

Book

Makes it easy to create multi-page resources with a book-like format. This module can be used to build complete book-like websites inside of your Moodle course.

- » Previously created websites can be imported directly into the Book module. Books can be printed entirely or by chapter.
- » The book module allows you to have main chapters and sub chapters, but it goes no deeper. In other words, sub chapters cannot have their own sub chapters.
- » The book module is not interactive. You can, however, link to choices, forums etc., from within a book. You can also include multimedia objects like Flash movies in your book.

Contact Form Block

Allows students to email the teacher of a course. If a course has multiple teachers, the student gets to select the teacher(s) to send the email to. Copies are CC'd to the Administrator.

DragMath

Allows students to build mathematical expressions using a graphical drag-and-drop interface similar in appearance to those available in a number of office productivity suites.

Illuminate Live

Integrates Illuminate web conferencing / online meeting software with Moodle

Face-To-Face

Uses activities to keep track of, manage and remind users of face-to-face training sessions which require advanced booking. This module may be of interest to administrators looking for a way to provide event management support for blended learning environments.

Feedback

Allows users to complete online feedback style forms using a variety of user input methods. You can create your own questions and set advanced questionnaire options for your feedback form.

Flashcards

Allows you to edit and play flashcards. Flashcards are "memory training" devices that repetition to facilitate effective learning. Checking a flashcard deck will present the student with the couples of relationships to be memorized.

Google Apps for Moodle

Integrates Google Apps services with Moodle. Moodle administrators can manage Google Apps accounts within Moodle and Moodle users can access Google Apps services from within Moodle.

Months course format

Displays course sections with one section per month.

MrCUTE Jr.

Allows shared resources to be created and added to several courses at once. Access to search/add/edit is restricted to teachers.

Quickmail for Large Classes

Adds a link and a mail composition text area to a tool that has a checkbox list of all students in the course. Teachers can check off the students they wish to contact and email them. Quickmail enhances the existing communications systems of messaging (one user) and subscribed forums (all subscribers) by allowing teachers to select a specific subset of students to message.

Scheduler

Used to schedule one-on-one appointments between teachers and students. A teacher can specify the periods during which they are available to see students and the length of each appointment and students can then book themselves into one of the available timeslots. The module also allows each appointment to be recorded and/or graded.

User Stats Block

A configurable block which displays site usage statistics such as: number of users, teachers, courses, active users and number of days since last login. Information displayed in the block is easily configurable and can be displayed to all users, or only selected groups, such as block administrators.

ABOUT LAMBDA SOLUTIONS

Lambda Solutions is a full service eLearning company and Moodle partner, specializing in Online Course Development and a variety of Moodle services, including Moodle Hosting, Moodle Support, Moodle Provisioning, Moodle Training and Moodle Consulting. Our goal is to provide cost effective quality eLearning solutions that are easily deployed in companies and organizations, large and small.
